

LYB.POL.02 - Environment Policy

LYB Operations & Maintenance Pty Ltd (the Company) operates and maintains the 1,100 MW brown coal fired station, Loy Yang B Power Station.

We are dedicated to protecting the environment and supporting practices that reduce/prevent pollution. We respect the rights of the communities we operate within and believe that sound environmental performance contributes to our competitive strength and benefits our stakeholders. We are focused on operational excellence and continually improving our environmental performance and will achieve this by:

- Striving to ensure that employees, contractors and visitors operate in accordance with this policy;
- Continually improving the effectiveness of the Environmental Management System to enhance Environmental Performance through identifying Environmental Aspects and Impacts and setting and reviewing Environmental Objectives and Targets within the Business Plan and the annual Environment Improvement Plan;
- Utilising research and the implementation of commercially viable technologies to manage environmental impacts, reduce emissions and convert fuel energy into electricity as efficiently as practical;
- Implementing control measures designed to prevent land, water and groundwater contamination;
- Systematically identifying, investigating, evaluating and reporting of natural resource improvement opportunities including the reduction, reuse, and recycling of wastes;
- Developing facility closure plans and incorporating them into our business planning and accounting practices;
- Supporting the communities within which we operate, respecting their diverse cultures and managing the potential impacts associated with our operations;
- Maintaining information and records relating to environmental management and disclosing our environmental performance to our external stakeholders in a transparent manner;
- Complying with all applicable legislation, regulations, obligations, agreements, environmental licences conditions, codes of practice, Australian Standards, and other relevant statutory obligations, and delivering appropriate risk-based application of the relevant industry standards, guidelines and best practice principles;
- Maintaining and demonstrating compliance to an Environmental Management System certified to AS/NZS ISO 14001 and ensure effective integration with the AS/NZS ISO 9001 Quality Management System; and
- Managing the significant environmental regulatory reform that is anticipated in the short to medium term, which will include diligently reviewing our key impacts, such as air/greenhouse emissions, disposal of drainage, ash and saline water and our consumption of natural resources.

It is the responsibility of all our employees, contractors and visitors to support this policy by reasonably performing their associated duties under it and reporting environmental incidents and impacts to an appropriate level of management in a timely manner.

Tony Hicks
General Manager, Loy Yang B
